

Psi information system software design for parapsychological research *SIPSI V.3.0*: references, bibliometry research and video-dvd collection database

Results:

The aim of the SIPSI v.3.0 is to include a bibliographic citation and/or an abstract, of any book or article (scholarly or popular), thesis, chapter, conference proceedings paper, or separate report or monograph on parapsychology or related consciousness studies. SIPSI v.3.0 is a collection of computerized bibliographic databases that emphasize parapsychology and related consciousness disciplines. The latter includes literature on altered states, spiritual disciplines that may be psi-related, the mind-body relationship, consciousness anomalies, and theories, methods, and techniques dealing with aspects of consciousness. Where obtainable, citations to non-English language materials are also included, if possible with English and non-English abstracts. Non-English languages included are Dutch, French, German, Italian, Japanese, Polish, Portuguese, Russian, and Spanish. Also included are relevant articles published in subject specialist journals in such fields as psychology, physics, engineering, education, philosophy, religion, psychiatry, medicine, literature, folklore, mathematics, anthropology; general science magazines. SIPSI includes also books and articles on parapsychology from 1900 to date and some of the most relevant books from other disciplines up to 2010 were included.
