

Comparing cognitive styles among parapsychology researchers, psi-believers, and skeptics (Grant n° 212/20)

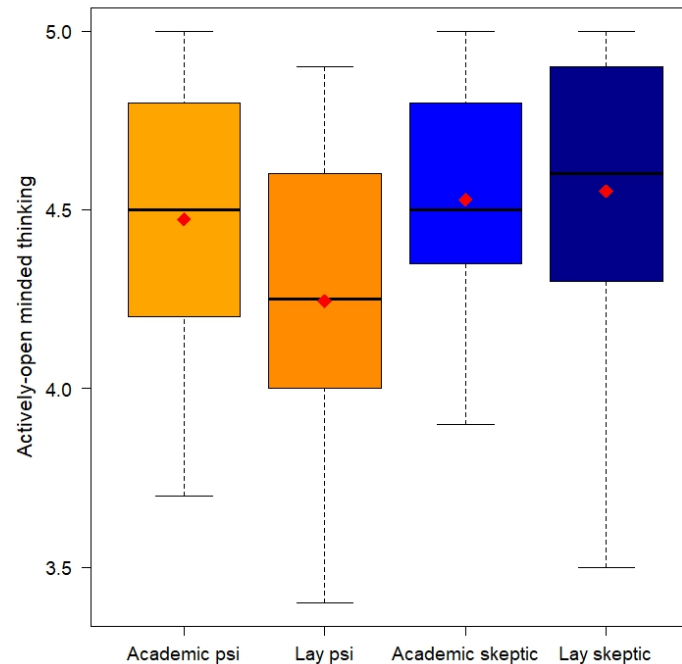

Marieta Pehlivanova & Bruce Greyson
Division of Perceptual Studies, University of Virginia School of Medicine

ESP
PK
Reincarnation

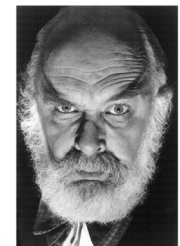

Ψ

Actively open-minded thinking =
willingness to consider evidence
that goes against one's beliefs

“faulty results”
“poor thinkers”
*“an assault on science
and rationality”*
“crazy”
